About The American Jersey Cattle Association

Organization. The American Jersey Cattle Association (AJCA) was organized in 1868 and is the oldest dairy breed association in the U.S. The AJCA has 2,063 active members (February, 2019) and provides services to more than 8,000 Jersey owners each year. The membership elects a 12-person Board of Directors plus a President. In addition to the AJCA, there is National All-Jersey Inc. (NAJ) and its subsidiary, All-Jersey Sales Corporation (AJSC). NAJ, which at the end of 2018 had 1,010 members, has its own Board of Directors. Policy, programs, and services for all three organizations are carried out by a 38-person full-time professional staff under the direction of the Executive Secretary & Chief Executive Officer.

The purposes of the American Jersey Cattle Association are to improve and promote the breed of Jersey cattle in the United States and to maintain such records and activities as the Association deems necessary or conducive to the best interests of the breeders of Jersey cattle.

National All-Jersey Inc.'s purposes are to promote the increased production and sale of Jersey milk and milk products, and to promote Jersey cattle and the interests of breeders of Jersey cattle.

Programs and services designed to serve these purposes include:

- Registration. A total of 132,166 animals were recorded in the association's animal database during 2018. The three-year average (2016-18) for registrations is 142,843. Since its organization in 1868 and through December 31, 2018, the AJCA has compiled pedigree records for 6,787,570 animals. Jerseys *(registered and unregistered)* comprise an estimated 14% of all dairy cows in the United States, and increasing at an accelerating pace. The population of Jersey cows at December 19, 2018 was estimated at 1.3 million head.
- Production, type appraisal, and genetic information. There were 167,326 Jersey cows enrolled in AJCA performance evaluation programs at December 31, 2018, with linear type information collected from 105,336 animals during the year. AJCA was nominator for 49,067 female animals genotyped in 2018, with 353,180 genotyped males and females contributing to CDCB official evaluations through December 2018.
- Education and promotion through publication of a monthly magazine, *Jersey Journal (also available online at http://jerseyjournal.usjersey.com)*, a website at USJersey.com, Facebook pages (USJersey, Jersey Journal, Queen of Quality®, Jersey Marketing Service), plus news releases.
- Funding Jersey-specific research. The Jersey organizations have an endowed Research Foundation that funds competitively selected and directed research projects *(see www.usjersey.com/Programs/ Researchprogram.html)*. Since 1988, more than \$1 million has been invested in research using Foundation's resources.
- Assisting Jersey owners in finding markets that pay for the added value of Jersey milk. Market-average Jersey milk (4.90% fat, 3.69% true protein) was valued at 35% more than market-average milk (3.5% fat, 2.9% protein) across Federal Order markets for the first three quarters of 2018. Jersey milk in orders with multiple component pricing (MCP) was valued up to 26% more than average milk.
- Marketing of live cattle and embryos. In 2018, Jersey Marketing Service, a subsidiary of NAJ, marketed 2,882 live animals, plus embryos and semen for \$4,176,358 through private treaty and at public auction.

Production. Jerseys produce the highest quality milk in the world. Weighing 1,050 lbs. on average, they are also the most efficient converters of feed to milk. The 2018 AJCA lactation average (m.e. adjusted) for Jerseys enrolled in AJCA testing programs was:

20,041 lbs. Milk 977 lbs. Fat 741 lbs. Protein Cheese Yield: 2,521 lbs. Actual 305-day ECM: 21,913

Jerseys also have the highest yield of manufactured products, explaining high demand for Jersey milk:

Estimated Yield of Manufactured Dairy Products per 100 lbs. Jersey milk

	Cheddar Cheese	Cottage Cheese	Swiss Cheese	Mozzarella Cheese	Butter	
	12.96 lbs.	14.21 lbs.	11.18 lbs.	15.51 lbs.	4.59 lbs.
